

Pedestrian Guard Rails

Total Fencing have been a major manufacturer of both standard and decorative Pedestrian Guardrails for many years and can offer advice on suitable solutions.

Our railing systems provides the ultimate in visibility whilst still guiding pedestrians to safe crossing locations. Accident statistics show that this simple invention has led to a dramatic reduction in accidents involving child pedestrians.

The appearance of standard and high visibility guardrails can be further enhanced by the addition of rings and finials, particularly with the application of a polyester powder coating or wet paint system.
